artist's statement Phillip Guzy

Phillip Guzy is a formally trained artist and received his BFA from the University of Illinois in Painting. He also trained as a Medical Artist on the graduate level at the University of Illinois in Chicago and creates professionally in that field.

"In addition to being a fine art painter, I am a trained medical artist. My work reflects this and is often inspired by the human body. I hope that my work has enough ambiguity in its expression that people can draw their own experience into the work, kind of like a favorite song might. My own experience is there, but hopefully you don’t need to know what it is to get into the painting. Ultimately I just love color and the act of painting and it’s a bonus when other people enjoy it as well."

Thanks

Phil Guzy
